Duties and Responsibilities

PRODUCTION CONTROL MANAGER

Throughout Inductotherm's history, we have pioneered a number of "firsts" in our industry. We continue to grow in size and scope, creating and refining technologies that were scarcely theoretical, let alone practical, just a short time ago. It's inspiring to see how far we've come. We believe that some of our greatest moments are yet to be developed as we continue to make advancements.

Candidate should have a Bachelor's Degree in Industrial Engineering Technology with concentration in manufacturing, or equivalent work experience. We offer a Comprehensive Benefits Package.

Essential Functions:

- Planning the use of resources and scheduling activities in order to meet objectives.
- Improving existing operations, incorporating new methods and processes.
- Handling equipment purchase and installation.
- Investigating operational problems affecting production and dealing with them in a systematic, methodical manner.
- Preparing manufacturing documentation required for product manufacture.
- Identifying ways to reduce production costs.
- Working with engineering and other departments to produce cost estimates for new designs.
- Understanding and analyzing graphs and statistics and other complex information.
- Training, supervising staff and running meetings with other team members.
- Analyzes and plans work force utilization, space requirements, and workflow, and designs layout of equipment and work space for maximum efficiency.
- Confers with vendors to determine product specifications and arrange for purchase of equipment, materials, or parts and evaluates products according to specifications and quality standards.
- Estimates production times, staffing requirements, and related costs to provide information for management decisions.
- Confers with management, engineering, and other staff regarding manufacturing capabilities, production schedules, and other considerations to facilitate production processes.
- Apply statistical methods to estimate future manufacturing requirements and potential.
- Strong technical knowledge and expertise; an analytical approach to work.
- An interest in solving scientific and technical problems.
- Good communications skills, both oral and written.
- The ability to get along with and work effectively alongside a wide range of people.
- Good organizational, time-management and leadership skills.
- Self-motivated and self-driven individual; awareness of health and safety issues.
- Will be required to complete miscellaneous duties as assigned.
